Slim LED Frames

Extra thin 3/8 backlit displays. LED lights in the frame are diffused across the clear acrylic face to evenly and consistently backlight the entire surface. Meant to be permanently mounted to interior walls with the included standoffs. A clear plexiglass front panel protects your graphics. Powered by a 110v to 12v wall adapter, with an on/off switch on the back. LED lights produce almost no heat, consume about 75% less energy, and last about 4 times longer than florescent lights.
